9. FINANCIAL RATIO REPORTING

Please provide information on your firm's financial operations by reporting two separate financial ratios. In computing these ratios, please note the following:

- The ratios must be calculated using generally accepted accounting principles or another internationally recognized accounting standard, consistently applied.
- The ratios must be calculated using the accrual method of accounting.
- For firms that are dually registered as a CPO and CTA, and file both the PQR and PR, the ratios will be carried over between the forms and can be amended on either filing
- Always use the absolute value of the respective balance. Ratios should not be reported as negative numbers. Further, firms should report a ratio of "0" if the denominator is 0.

a. Holding Company/Subsidiary Reporting

Firms that are part of a holding company/subsidiary structure may elect to report the two ratios at the Parent/Holding Company level or the Subsidiary Member Firm level.

Are you a subsidiary in a holding company structure?

A001

b. Reporting Period

A firm that has a fiscal year end that does not align with the reporting quarters may report the ratios as of the firm's most recently ended fiscal quarter.

Are the reported ratios for a period with the same end date as the end date of this PR filing (i.e. PR reporting date is 6/30/2017, Current Assets/Current Liabilities Ratio as of 6/30/2017)?
